

A series of vases and coasters using silver thread usually used for kimono. The vases function with a small cup or bottle inserted in them. They become flat when folded. The silver thread is produced in Kyoto, Japan. The material is twisted yarn of pure silver coated polyester film prepared by vacuum deposition, together with rayon thread. Colored thread is prepared on the surface of the vacuum deposition. It is stain resistant and washable thanks to the polyurethane finish.

- use/ vase, coaster
- materials/ silver, polyester, rayon
- design/ Design nayobika
- origin/ Japan
