

YOnoBI

chushin kobo **GARDEN**

A unique Yamagata casting teapot / kettle crafted by Hisanori Masuda. A series of small creatures of the garden is molded on top of the lid. Animals are designed by Kiriko and the rest by Masuda. There are three animals, butterfly, frog and bee in two colors, ebony and dark brown. Such creatures have always been a popular motif for Japanese craft, but it is rather rare to find them on top of such a lid. It is finished with fine Urushi lacquer on the outside for delicate and elegant look and it is enamel coated on the inside to prevent rust from gathering. It can be heated directly on the stove. Also compatible with induction cookers. Can be used as a liquor container.
