

rolo ashtray GA
 “kanazawa metal leaf” version

This iron ashtray is a collaborative result of Yamagata casting and Kanazawa gold and aluminum leaf. The leaf finish is done by Hakuza, one of the oldest gold leaf producers in Kanazawa. The weight and the unique feel of it are a testament to the quality of the casting iron. The modest but strong presence will be a nice accent to your tabletop. The ashtray consists of 3 parts and the inner lid is reversible. One side of the inner lid is for one cigarette and the other is for two. Upper lid has a round hole on top, which prevents smoke from spreading around.
