

An aroma pot made of pale porcelain. Aroma of oil heated by the candle efficiently spreads through many holes on the top. Additional radial holes on the lower part also let you enjoy the candlelight for even more relaxation. Designed by Akihito Fumita, one of the leading figures in Japanese interior design, and hand-made by ceramist Takeo Hasegawa. Comes in three different sizes.

* Fill the inner pot with water and a few drops of aromatic oil and heat it with candle. Candle is not included.
